

2025 OSINT Resource List

General Frameworks & Tool Collections

Aggregators that link to hundreds of other tools.

- [IntelTechniques](#): The industry standard for OSINT workflows and search tools by Michael Bazzell.
 - [Start.me Collections](#):
 - [ZME8nR/OSINT](#): A highly popular, curated dashboard.
 - [m6XQ08/OSINT](#): Another extensive collection of research links.
 - [rxE68b/OpSec](#): Specifically focused on Operational Security.
 - [rLGmnn/Images](#): Focused on image verification and IMINT.
 - [OSINT Framework](#): Directory of tools broken down by data type.
 - [All-in-One OSINT \(Web-Check\)](#): A powerful tool that runs multiple checks (DNS, SSL, Whois, Headers) on a URL instantly.
 - [Limitless OSINT](#): A blog and tool repository.
 - [OSINT Combine](#) / [Tools](#): Professional training and a collection of free software utilities.
 - [GitHub Collections](#):
 - [Awesome OSINT](#): The "master list" of open-source intelligence tools.
 - [Cipher387](#) / [Cheatsheets](#): Username logic and interactive tool lists.
 - [The OSINT Toolbox](#): A repository of scripts.
 - [TCM Security Resources](#): Resources from their OSINT course.
 - [Investigators Toolbox](#): Resource hub for professional investigators.
 - [GoOSINT](#): Directory of open-source intelligence tools.
-

People, Usernames & Email Intelligence

Tools to find people, check usernames across platforms, and verify contact info.

- **Username Enumeration (Web-based):**
 - [NameVine](#): Instantly checks username availability across major platforms.
 - [Instant Username](#): Fast search for usernames on 100+ sites.
 - [WhatsMyName \(Python\)](#): The gold standard script for finding where a username is used.

- [User-Searcher](#): Scans massive lists of websites for username presence.
 - **Username Enumeration (Command Line/Scripts):**
 - **[suspicious link removed]**: Powerful tool to collect a dossier on a person by username.
 - [Sherlock](#): Hunt down social media accounts by username.
 - [Blackbird](#): Rapid username scanner.
 - **Identity & Contact Info:**
 - [CyberBackgroundChecks](#): US people search (address, phone, relatives).
 - [Epieos](#): Reverse email search (Google Maps/Calendar link) and phone lookup.
 - [GHunt](#): Advanced investigation of Google accounts (extracts services, photos, reviews).
 - [Phonebook.cz](#): Lists all domains and emails associated with a target domain.
 - [FaceCheck.id](#): Facial recognition search engine.
 - [Doing Fed Time](#): Specific resources regarding federal inmates and prisons.
 - [Spy Dialers/WakeUpDialer](#): Tools for reverse phone lookup or voicemail checking.
 - [CallMyLostPhone](#): Verify if a number is active.
 - [Phone Reputation Score](#): Checks the "spam score" of a phone number.
-

Geospatial Intelligence (GEOINT)

Tools for maps, sun analysis, WiFi, and tracking.

- **Mapping & Street View:**
 - [KartaView](#): Open-source street level imagery (alternative to Google).
 - [F4 Map](#): 3D rendering of OpenStreetMap data.
 - [Dual Maps \(WhatIsWhere\)](#): Combine Google Maps, Street View, and Bing Maps in one window.
 - [OSM Search \(Bellingcat\)](#): Search OpenStreetMap for specific features (e.g., "bars near hospitals").
- **WiFi & Electronics:**
 - [WiGLE](#): Database of wireless networks worldwide. searchable by SSID or BSSID.
 - [Geowifi](#): Tool to locate WiFi BSSIDs.
 - [NetSpot](#): WiFi site survey software.
- **Sun & Shadows (Chronolocation):**
 - [SunPath3D](#): 3D visualization of the sun's path for shadow analysis.

- [ShadowMap](#) / [ShadeMap](#): Visualizes shadows on a map at any specific date/time.
 - **Location Inference:**
 - [GeoSpy.ai](#): AI tool that guesses the location of a photo based on visual clues.
 - [GeoHints](#): Reference guide for distinguishing countries/regions in photos.
 - [Geocell](#): Mobile network location services.
 - [Ocean Trackers](#): Tracking marine vessels.
 - [NOAA Imagery](#): Real-time satellite imagery.
 - **Live Cams:**
 - [CamStreamer](#) / [WebcamTaxi](#): Directories of live surveillance/webcams.
 - [Watching The World](#): Webcams from around the globe.
-

Social Media Intelligence (SOCMINT)

Platform-specific analysis.

- **Twitter/X & BlueSky:**
 - [Twiiit](#): A unified interface to search Twitter easily.
 - [Nitter](#): Privacy front-end for Twitter.
 - [BlueSky Directory](#): Search for users on the BlueSky platform.
 - **YouTube:**
 - [Filmot](#): Search video subtitles.
 - [YouTube Metadata](#): Extracts exact upload times, tags, and hidden details.
 - **TikTok & Other:**
 - [Toutatis](#): Tool to extract information from TikTok accounts (email, phone, ID).
 - [Backmoji](#): Analyzes Bitmojis (Snapchat) to find user details.
 - **General:**
 - [Argos](#): Social media tracking tool.
 - [HandleHawk](#): Checks username handle availability.
-

Domain, IP & Infrastructure

Analyzing websites, servers, and digital connections.

- **Whois & DNS:**
 - [Whoxy](#): Reverse Whois API (find all domains owned by "John Smith").

- [OSINT.sh](#): Suite of tools (Reverse Whois, Analytics lookup).
 - [SecurityTrails](#): Massive database of current and historical DNS records.
 - [DNS Dumpster](#): Visualizes DNS maps.
 - **Scanners & Lookups:**
 - [Urlscan.io](#): Scans a website and takes a screenshot without you visiting it directly.
 - [CentralOps](#): "Swiss Army Knife" for network diagnostics (Ping, Traceroute, Whois).
 - [Redirect Detective](#): Shows the path of redirect links.
 - [Host.io](#): Domain relationship mapping.
 - [CRT.sh](#): Search for SSL/TLS certificates (often reveals subdomains).
 - **IoT & Search Engines:**
 - [ZoomEye](#): Search engine for specific devices, servers, and IoT connected to the internet.
 - [CriminalIP](#): Threat intelligence search engine.
 - [Netlas](#): Scans and indexes internet assets.
 - **[suspicious link removed]**: URL scanner and internet traffic trends.
 - **Expired/Old Domains:**
 - [ExpiredDomains.net](#): Searchable database of dropped domains.
 - [Traffickk](#): Expired domain research.
 - **Google Dorking:**
 - [DorkSearch](#): Visual builder for advanced Google search queries.
-

Cyber Security, Dark Web & Breaches

Threat intel, ransomware tracking, and leak databases.

- **Breach Data:**
 - [Breach Directory](#): Search known data breaches.
 - [HavelBeenSold](#): Checks if your data is in data broker databases.
 - [OSINT Industries](#): Email and phone breach intelligence.
 - [SOCRadar Labs](#): Breach and dark web monitoring.
 - [Postleaks](#): Tool to monitor Pastebin-like sites for leaks.
 - [CyberNews Leak Check](#): Personal data leak checker.
- **Dark Web & Ransomware:**
 - [Dark.fail](#): Directory of live .onion (Tor) links.

- [DarkOwl](#): Darknet data intelligence.
 - [Ransomlook](#): Tracks ransomware group activities and victim lists.
 - [Dark Web Daily](#): News and updates on dark web activity.
 - [Tor Proxy](#): Access Tor sites via a standard browser.
 - **Threat Intelligence:**
 - [GreyLens Phish](#): Phishing analysis.
 - [KeyFindings](#): Cybersecurity blog.
 - [ShadowDragon](#): Enterprise investigation platform.
-

OpSec & Persona Creation (Sock Puppets)

Tools to protect yourself and create fake identities for research.

- **Generators:**
 - [Fake Name Generator](#): Create full fake identities.
 - [This Person Does Not Exist](#): (Implied by context) AI face generation.
 - [FakeID \(Businer\)](#): ID card generator (for novelty/verification bypass testing).
 - **Communication:**
 - [JMP.chat](#): XMPP to SMS gateway.
 - [TextFree](#): Web-based SMS and calling.
 - [Temp-Mail](#): Disposable email addresses.
 - [SMS Verification](#): Service for receiving OTPs.
 - **Anonymity:**
 - [Kali Anonsurf](#): Route all traffic through Tor on Kali Linux.
 - [Personal Security Checklist](#): Guide to securing your digital life.
 - [ProxyScrape](#): List of free proxies.
-

Business, Finance & Documents

Corporate records and legal documents.

- [OCCRP Aleph](#): Organized Crime and Corruption Reporting Project database.
- [Offshore Leaks \(ICIJ\)](#): Search the Panama Papers and other offshore leaks.
- [JudyRecords](#): US Court cases search.
- [Bankrupt11](#): US Bankruptcy records.
- [AcreValue](#): Land ownership and soil data.

Image, Video & File Tools

- [Cleanup.pictures](#): AI tool to remove objects/people from images.
- [Favihash](#): Calculate the hash of a favicon (useful for finding phishing sites using the same icon).
- [Carnet.ai](#): AI that identifies the make/model/year of a car from a photo.
- [29a.ch Photo Forensics](#): Image manipulation detection.
- [DeDigger](#): Search for files on Google Drive.

Training, Blogs & Communities

- [My OSINT Training](#): Comprehensive courses.
- [OSINT Dojo](#): Gamified learning path.
- [Bellingcat Resources](#): Guides on how to investigate payment gateways, maps, etc.
- [Hacktoria](#): CTFs and "contracts" to practice OSINT skills.
- [Skull Games](#): Community leveraging OSINT to fight human trafficking.
- [Antisyphon Training](#): InfoSec training courses.
- [Forensic OSINT](#): Blog and tutorials.
- [Oh Shint!](#): OSINT blog and resource list.
- [Bullshit Hunting](#): Investigative journalism blog.

Miscellaneous / Specific Utilities

- [MailStore Home](#): Email archiving software.
- [Grype](#): A vulnerability scanner for container images and filesystems.
- [Tookie OSINT](#): Multi-tool script.
- [LazyEgg](#): A script to automate some reconnaissance.
- [Website Informer](#): General website stats.
- [Tiny Scan](#): URL scanner.
- [KeepTrack](#): Satellite tracking.
- [Recon Village](#): DEFCON community for reconnaissance.
- [Ashok](#): All-in-one OSINT reconnaissance tool.
- [Ronin Recon](#): Ruby-based recon tool.
